Founded in 1999, Arcotec Quebec is a family business which remains true to its values today.

Our entire team is dedicated to satisfying our customers through top-quality products and exceptionally short delivery times.

At Arcotec, our customers' satisfaction is our priority.

STEEL DOORS

The commercial steel door is a very popular product on the industrial market. Made of the highest quality materials, it can meet a variety of needs.

Our doors are available in galvanized steel (STD or G90) and in a range of calibers, such as 14, 16, 18 and 20, and in multiple designs.

- Honeycomb: For interior doors
- Polystyrene: For exterior doors to provide minimum insulation or for soundproof interior doors
- Polyurethane: For exterior doors to provide maximum insulation
- Vertical stiles: For additional strength

A ULC-certified business, we offer very short delivery times for our steel doors, all of which meet fire-door standards. Our doors are promptly manufactured in our factory.

Other available products include:
lead-lined doors, security doors, and stainless steel doors

WOODEN DOORS

For a more attractive, welcoming touch, or simply for improved sound insulation, why not consider a wooden door? Whether for residential or commercial entranceways, we offer a wide range of wooden doors to meet your needs.

- Available in Masonite and in a variety of wood types including wild cherry, oak, maple, ash, cherry, and walnut
- Available in laminated veneer
- Factory finish option
- Available with glass inserts or applied moldings
- ULC certification, 20 to 90 minutes
- LEED Certified

No matter your choice of product, our wooden doors will fit in perfectly with your type of project.

Other available products include:
lead-lined doors, soundproof doors (STC), automatic doors.

STEEL DOOR FRAMES

We manufacture our own steel frames in our Arcofab division, and our factory has been specifically adapted to meet the various needs of our customers. This enables us to custom manufacture your door frame—and extremely quickly.

- Our steel door frames are available in galvanized steel (STD or G90) in a variety of calibers, such as 12, 14, 16, 18, 20 and 22.
- Thermal breakage for exterior frames
- Welded or mechanical manufacturing
- Great flexibility in the manufacturing of frames and side windows
- Upon order, delivery of frames within 3 to 4 business days
- ULC Certified

Please contact us at any time should you need to make adjustments due to changes or unexpected events—this way, you won't need to place a new order. These are just some of the ways Arcotec goes above and beyond to be more than just a distributor.

Other available products include:
lead-lined frames, sanitary base frames, steel windows, stainless steel frames.

WOODEN FRAMES

Let Arcotec match your wooden door to a wooden frame made of the same material. You will then have the option of ordering a complete, premium set in your choice of wood.

Available in several varieties of wood such as poplar, wild cherry, oak, maple, ash, cherry, and walnut
Available with silencer or moulding
Factory finish option
ULC Certification, 20 to 45 minutes

You can be certain that our wooden frames will lend the right “frame” of reference to your decor!

HARDWARE

Thanks to our collaboration with the architectural hardware specialist **Solution Maxime Drouin**, we have all the products you might need to match your door specifications.

- Distributor of a wide range of products to numerous companies
- Multiple grades and finishes
- Locksmith services
- DHI /AHC Certification
- Extensive inventory

Round, long, curved or straight—no matter the style, size or colour you’re seeking, we have the handle you need.

OTHER SERVICES

Our 15 years of experience in the door sector have given us the necessary expertise to provide you with the logistical support you require. From taking measurements to delivery to construction coordination—we do everything in our power to facilitate your project.

- Delivery service
- Taking measurements
- Estimates for requests for proposals (RFPs)
- Technical specification sheets and shop drawings provided upon contract acceptance
- A factory to meet your needs
- In-factory painting service

Follow the example of numerous industrial experts and entrust Arcotec with all your large-scale projects!
